Over 20 years

of insurance market operations
with a diversified portfolio

CLEAR DEFINITION OF STRATEGIES GUARANTEES FOCUSED DEVELOPMENT OF PRIORITY AREAS

GSE Group Mission

Contribute to industrial development through quality, reliable and timely implementation of **large-scale, full cycle projects**

Strategic Goal

Achieve **leadership in design and construction** of high-tech production facilities in focus industries

Focus Area

Implementation of full cycle projects in the **chemical, petrochemical, fuel and energy sectors**

Development Drivers

Advancement of **technology partnerships**

Digitalization of key processes by line of business

Management system improvement for maximum **synergies**

HUGE EXPERIENCE IN
IMPLEMENTING DIVERSE PROJECTS
PROVIDES A SOLID FOUNDATION
FOR FURTHER DEVELOPMENT

380+
designed

in chemical, petrochemical, fuel and energy sectors

200+
constructed facilities

7
onshore and offshore oil transshipment
terminals built

4
offshore ice-resistant fixed platforms
built

13+ thous. km
of oil and gas pipelines lain

100+
oil and gas fields with facilities
constructed

ⓘ Today GSE Group is focused on design and construction of chemical and petrochemical facilities, including high-tech manufacturing of the following product categories:

- Synthetic rubber
- Polymers
- Plastics
- Catalysts
- Fertilizer

"GSE-GIPROKAUCHUK" LLC IS THE HOLDING'S INTELLECTUAL CORE AND A SOURCE OF GSE GROUP'S TECHNOLOGY ADVANTAGES

90+

years of design
experience

350+

employees, more than 70%
of them with length of
service exceeding 15 years

380+

projects
implemented

6

branches

Design

Design work at all stages (feasibility study,
design documentation, detailed design)

Process design and modeling

Re-engineering
3D Modeling

Defending project solutions at the State Expert
Evaluation Department and the State
Environmental Review Board

Engineering surveys and exploration

Field work (geodetic, geological)
Field data analysis

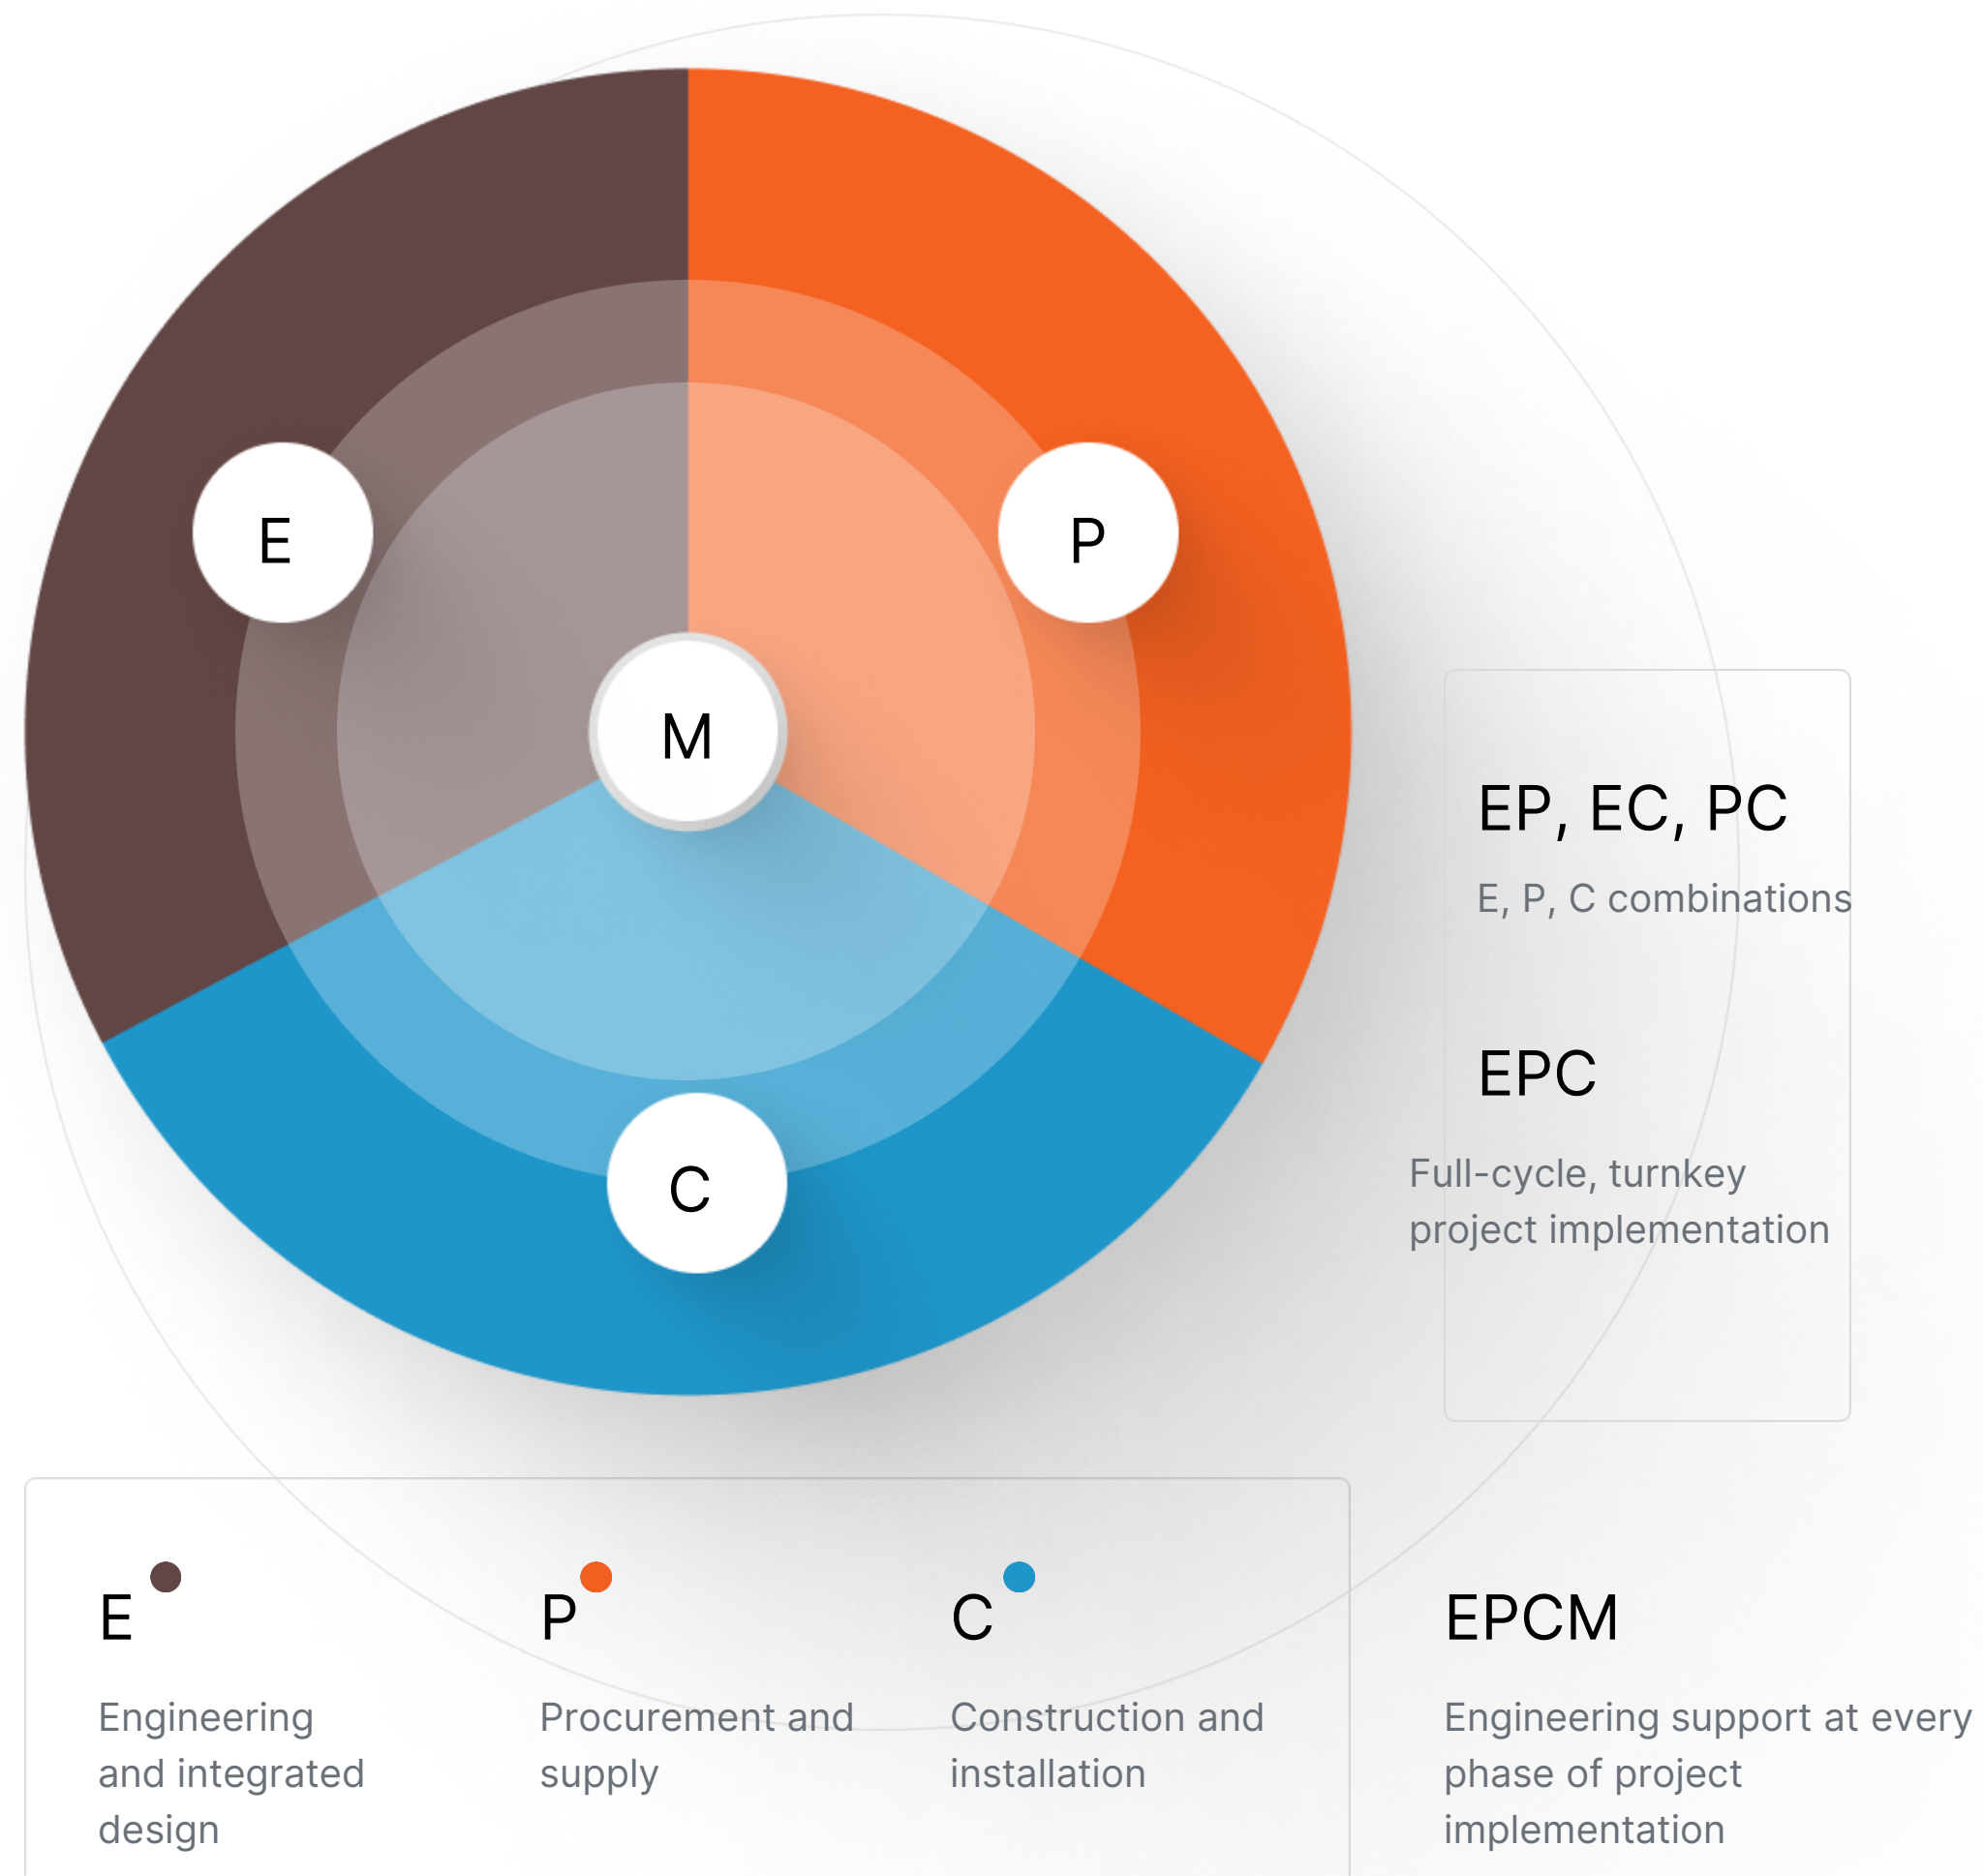

Designer supervision and technical support for construction operations

Designer supervision
Technical support for construction operations
Field engineering

GSE-Giprokauchuk advantages
arise from a combination of
experience and modern
technologies:

- Unique competences in designing petrochemical and chemical manufacturing facilities
- Huge experience in transacting with international licensors
- Focus on minimizing Customer's operational and financial risks
- Customized integration with the Group's construction enterprise systems
- Application of modern BIM tools

GSE GROUP COMPETENCIES AND
RESOURCES ENABLE IT TO
IMPLEMENT ALL TYPES OF
CONSTRUCTION PROJECTS UNDER
ANY VARIATION OF E-P-C-M

PROACTIVE MANAGEMENT INITIATIVES ARE AIMED TO ATTAIN LEADERSHIP IN EPC PROJECT IMPLEMENTATION

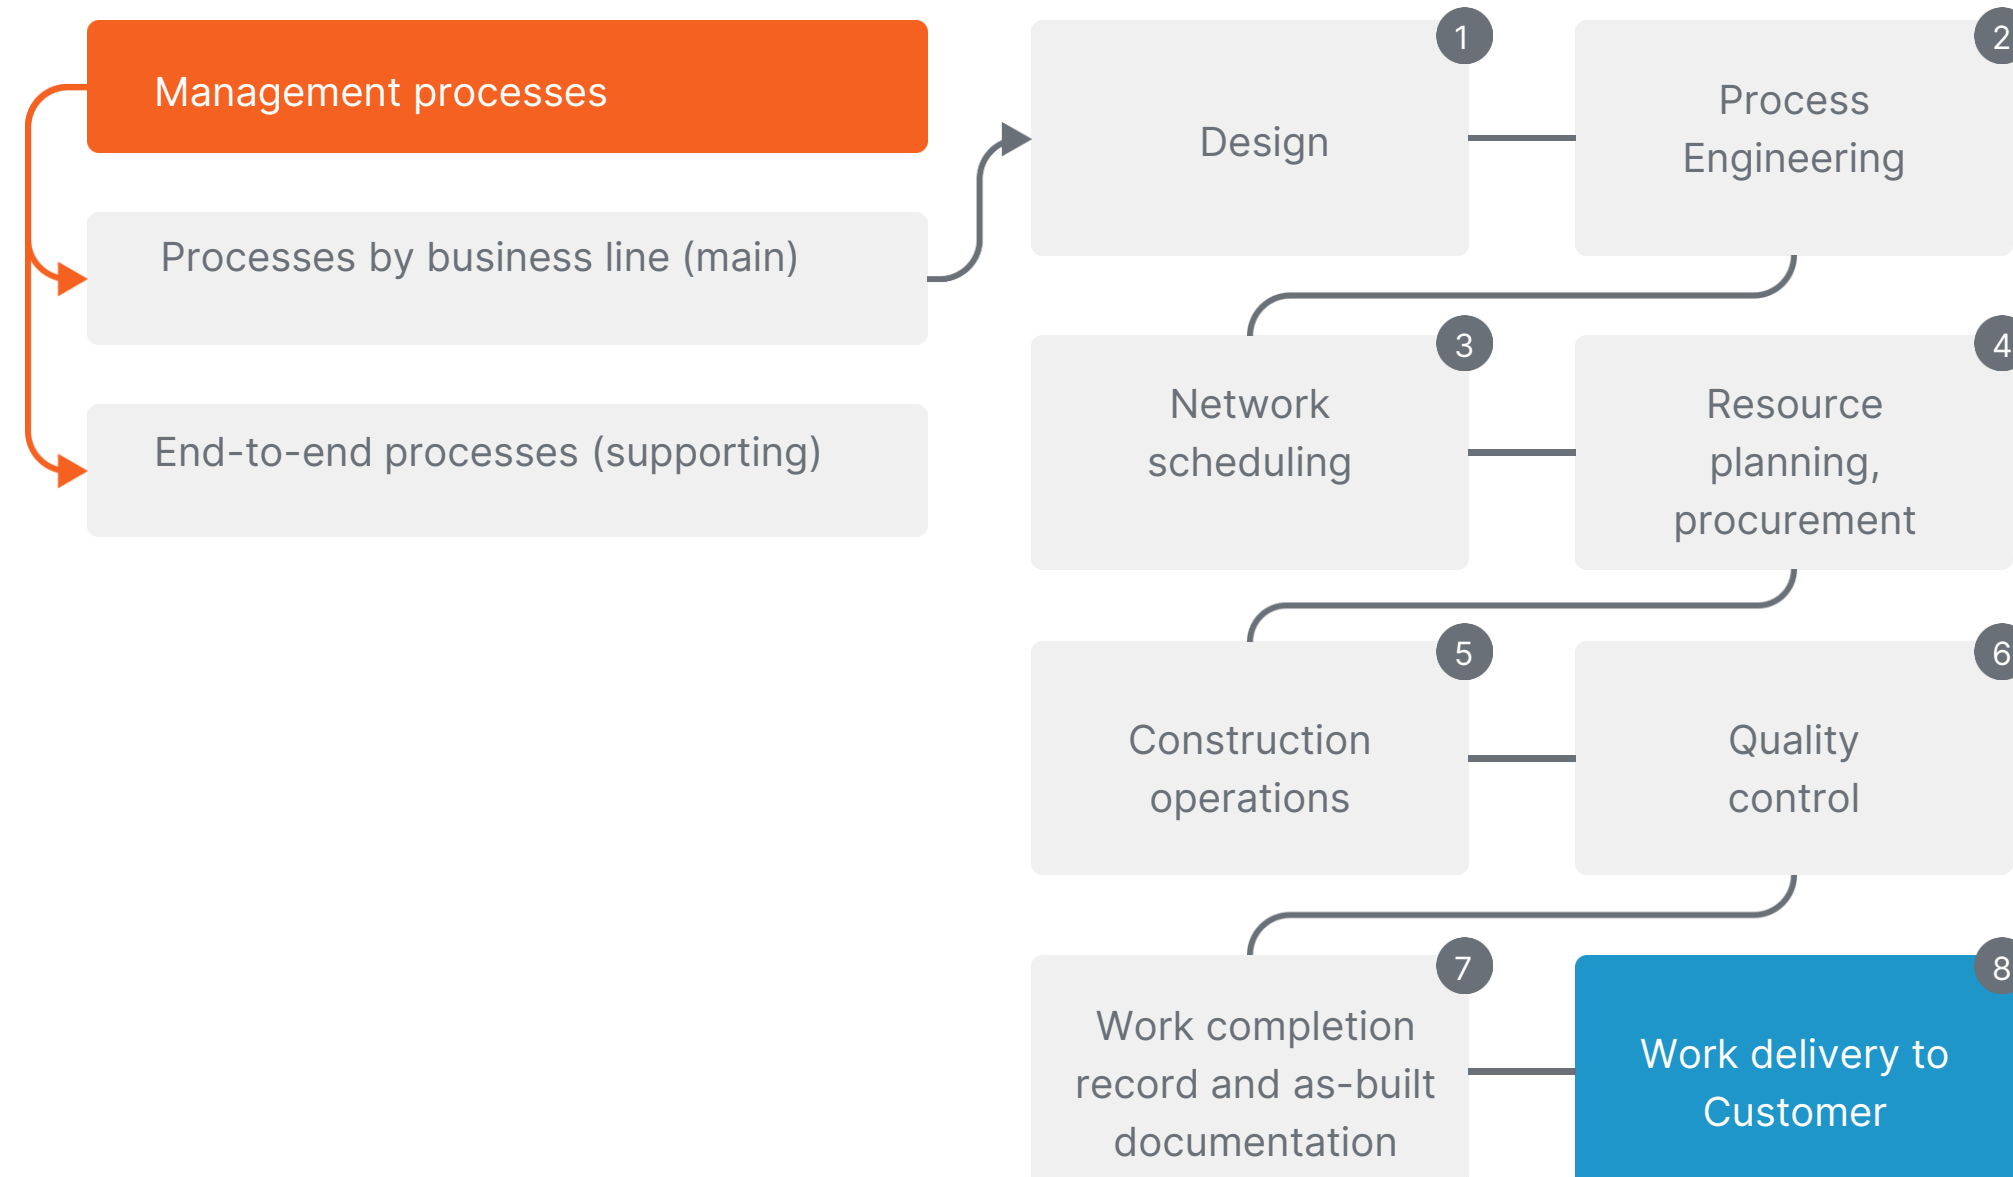

Business process model

Regulating

Digitalization

In order to adapt to the variable market situation and proactively generate capacity for continuous development, management initiatives have been implemented towards updating business process management model, and regulating and digitalizing business processes

Group Business Process Model

THANK YOU!
